# NEW My Shed Feature on AbileneMachine.com

**A new way to narrow down your parts search  
geared specifically to your equipment**

Select the make, equipment and model of your machine in the dropdown menus located at the top of the home page. Click the "Go" button.

The diagram illustrates the process of selecting equipment. On the left, the initial search form has dropdown menus for 'Make', 'Equipment Type', and 'Models', along with a 'GO' button and a 'Sign in' link. An arrow points to the right, where the same form is shown with 'John Deere' selected for 'Make', 'Tractor' for 'Equipment Type', and '4440' for 'Model'. The 'GO' button is now highlighted in black.

With your equipment selected, enter the product you are searching for (or part number if you have it). Suggested results will be displayed, or press enter to go to a list of all product results for your machine.

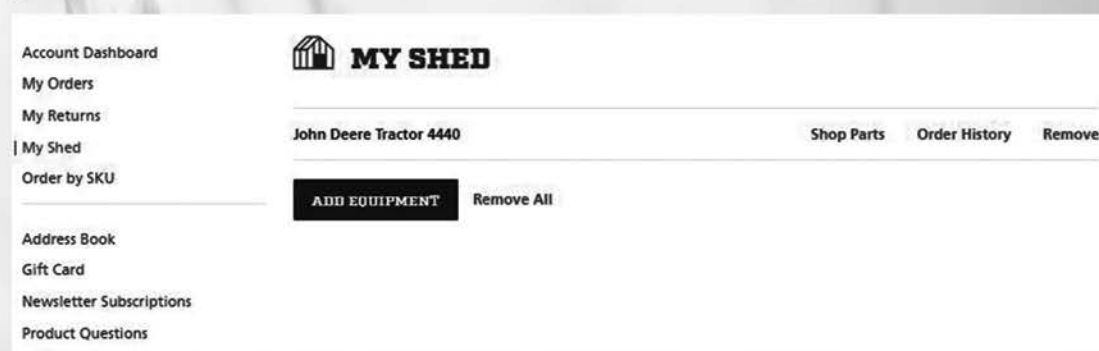

The diagram shows the search results for 'Seat Assembly' on a John Deere Tractor 4440. The search bar at the top shows 'John Deere Tractor 4440' and 'Seat Assembly'. Below the search bar, there are suggestions for 'seat assembly', 'seat and suspension assembly', 'grammer seat and suspension assembly', 'seat assembly with', and 'grammer seat assembly'. The 'Products' section shows two items: 'Grammer Seat Assembly, Gray Fabric (AMSS10040)' for \$820.00 and 'Grammer Seat and Suspension Assembly, Brown Matrix Fabric (AMSS10018)' for \$1125.00. On the right, a list of 13 results is shown for 'SEAT ASSEMBLY'. The first three results are: 'GRAMMER SEAT AND SUSPENSION ASSEMBLY, BROWN MATRIX FABRIC (AMSS10018)' for \$1125.00, 'GRAMMER SEAT ASSEMBLY, BROWN MATRIX FABRIC (AMSS10027)' for \$495.00, and 'GRAMMER SEAT AND SUSPENSION ASSEMBLY, BROWN MATRIX FABRIC (AMSS10019)' for \$850.00. Each result has an 'ADD TO CART' button.

# With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

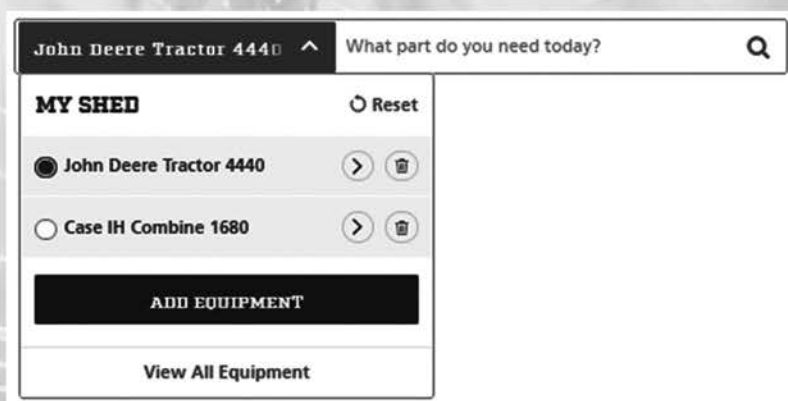

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need. As a thank you for reading about our new My Shed program, please use the code MYSHED for a 5% discount on one order through December 31, 2023.

## Feederhouse Chains

Our feederhouse chains for John Deere® combines use high-quality materials to meet exact specifications. Our t-slats are mounted in the middle of the links. Slat are mounted using 3/8" grade 5 plated bolts and locknuts for easy replacement. Chains feature full side plates and high-strength steel for added durability. Call for different slat and chain configurations available to fit your application.

# Draper Belts

Abilene Machine is proud to offer the Q-Power® line of heavy-duty draper belts to keep up with the demands of harvest. These best-selling products are comparable to OEM parts in tensile strength, tear strength and puncture resistance. They are exceptional replacements for many makes, including John Deere®, New Holland®, Case IH® and MacDon®.

## Features and Benefits

### Teardrop Cleats for Better Durability

Our draper belts are reinforced with teardrop-shaped fiberglass rods for increased cross-directional strength and durability.

Teardrop vs Diamond Cleat

### Filament Fibers for Increased Tensile Strength

The patented design is made with filament fibers — long, continuous, uniform fibers — that consistently outperform belts made from typical spun fiber in strength tests. They stand up better to stretching and pulling than the competition.

### Coated for Enhanced Tear and Puncture Resistance

Q-Power® Draper Belts feature both skim and friction coating for enhanced performance. This rubber reinforcement is applied to the top (skim) and bottom (friction) of the belt, increasing durability and fabric protection, while reducing drag and belt weight.

*Abilene Machine is a family-owned and operated company that's been serving farmers for over 40 years. With an inventory of more than 40,000 parts and four locations across the United States, we'll make sure you get dependable, durable parts shipped fast.*

### Q-Power® is 29.5% stronger

### Q-Power® is 18.1% more tear resistant

### Q-Power® is 81.7% more puncture resistant

# Extended Wear Augers

Abilene Machine carries the best-built augers in the industry. Our in-house facility includes state-of-the-art equipment that balances, calibrates and tests our augers. These durable parts feature cupped flighting for longer life and greater grain-handling capacity.

## Features and Benefits

### Greater grain retention

Cupped Super-Edge™ Helicoid Flighting with enhanced edge thickness and up to 30° lean from vertical allows for increased grain-handling capability.

### Increased wear resistance

Key edges of the Super-Edge™ Helicoid Flighting are up to 50% thicker (and a guaranteed minimum of 30% thicker) than standard augers. The tapered edges have targeted reinforcement, so our augers are stronger at the exact spots that tend to wear more easily, giving them a longer life in the field.

### Improved strength and durability

Advancements in the Super-Edge™ Helicoid Flighting mean farmers have a stronger auger without extra weight and a more durable part.

### Optimized output

With a longer life and higher grain capacity, our augers provide productivity gains over a much longer period, significantly reducing the cost per bushel.
