With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

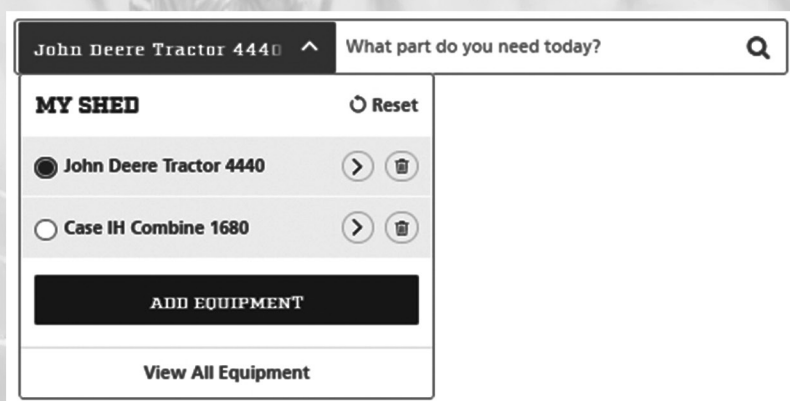

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need.

Longblock Assemblies

Our remanufactured longblocks meet the highest standards in quality. All remanufactured components are inspected for structural integrity, cracks and dimensional specifications and then remanufactured back to OEM specifications. The components are then assembled using the highest quality new parts. We back this with one of the best warranties in the industry.

Connecting Rods

All connecting rods are cleaned and inspected for defects prior to remanufacturing. Rods are then shot-peened for stress relief and the size is checked against OEM specifications. New piston pin bushings are installed in each rod and bored to the correct center-to-center dimensions. The center-to-center dimension greatly affects the performance of your engine and is a step that many remanufacturers ignore. Final assembly of our connecting rods include installation of new rod bolts and verifying product dimensions, including bend and twist, one final time.

Application	Description	Part Number	Retail Price	Core

1896, 2096	Valve Cover w/ Holes	AMJ902604	\$60.00	

Oil Pumps, Engine

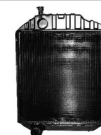

All of our remanufactured engine oil pumps are disassembled, thoroughly cleaned and inspected. All worn parts are replaced and tolerances are checked to guarantee our oil pumps will perform to OEM specifications. The pump is reassembled and - as a safety measure - each pump is lubricated with Clevite Bearing Guard to ensure there is no damage during initial start up. Replacing the engine oil pump during an overhaul is a step many people overlook.

Water Pumps

The remanufactured water pumps we supply have an extra step added to the remanufacturing process to ensure quality. Since the bearing and seal assembly are critical in performance, we ensure air-tight seals by vacuum testing our water pumps prior to packaging. This guarantees no leakage will occur after your water pump has been installed.

Injection Pumps

All of our injection pumps are disassembled, thoroughly cleaned and inspected. All worn out parts are replaced and the pumps are reassembled with new gaskets. Pumps are tested for leaks and fuel delivery at low idle, high idle, full load, part load and at start up. Any pumps with an automatic advance system has the advance set. As an additional quality check, all pumps are tested with a special oil that will not varnish inside the pump.

Mufflers and Exhaust

Our mufflers are manufactured by experienced craftsmen here in the United States. All mufflers have welded seams. Aluminized steel is used for critical components. These features ensure that our products resist the corrosive effects of air, heat and the by-products of combustion that work to shorten muffler life. Additionally, they are painted either silver or black to cosmetically match its OEM counterpart, as well as provide further protection from the elements.

Prices subject to change without prior notice, and products with NLA in the price column are no longer available. The use of original equipment manufacturer (OEM) part numbers or trademarks, e.g. Case® and John Deere®, are for reference purposes only and for indicating product use and compatibility. Our company and the listed replacement parts contained herein are not sponsored, approved or manufactured by the OEM. All parts are New unless designated Reman in the description.

Case®—Tractor

Starters

All of our remanufactured starters are disassembled, cleaned and inspected. Almost all units receive new field coils. If it meets OEM specifications the armature is test turned and under cut, otherwise it is replaced with a quality factory remanufactured or new part. Starters with factory solenoids have the solenoids replaced with new parts. The drive is carefully inspected and if it does not meet specifications it is replaced with new or quality factory remanufactured drives.
