# My Shed Feature on AbileneMachine.com

**Narrow down your parts search  
specifically to your equipment**

Select the make, equipment and model of your machine in the dropdown menus located at the top of the home page. Click the "Go" button.

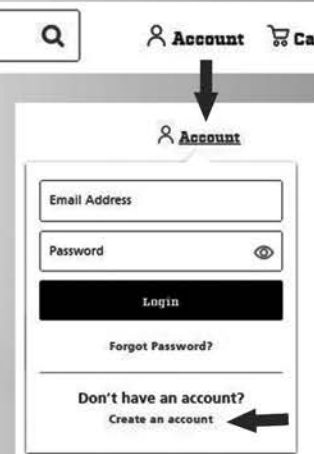

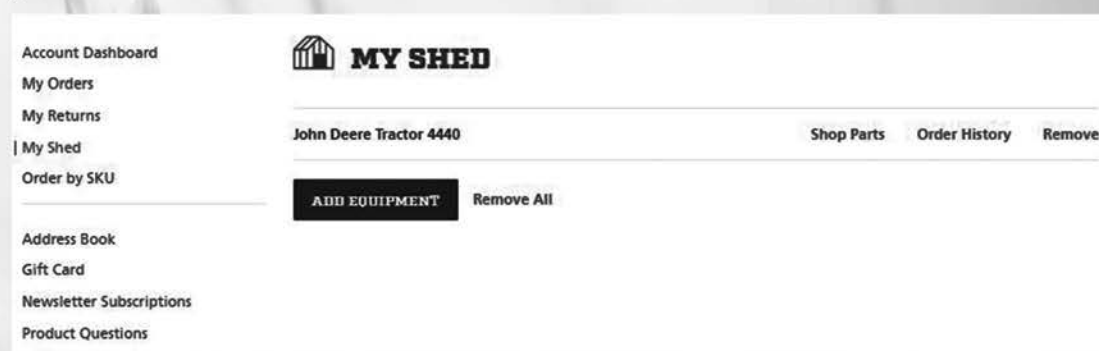

With your equipment selected, enter the product you are searching for (or part number if you have it). Suggested results will be displayed, or press enter to go to a list of all product results for your machine.

# With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

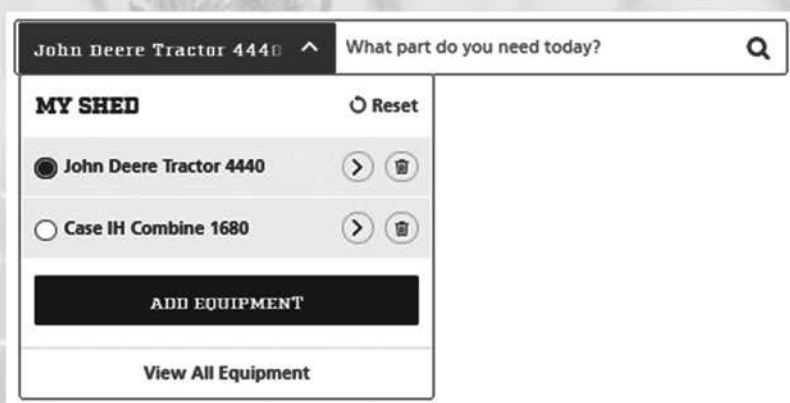

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need.

## Feederhouse Chains

Our feederhouse chains utilize high-quality materials to meet or exceed OEM specifications. Slats are mounted using 3/8" grade 5 plated bolts and locknuts for easy replacement. Chains feature full side plates and high-strength steel for added durability. All feederhouse chains come with serrated slats unless otherwise noted. Call for different slats and chain configurations available to fit your application.

Agricultural and Industrial Belts

Q Power® uses the highest quality materials and the most advanced manufacturing in the world to build their belts.

**Quality always comes through**

Ag Replacement Parts

Honest. Personal. Service.

## Feederhouse Chains

Harvest is tough on a combine. Replacing worn, bent or twisted chain bars and components ahead of time will help ensure your equipment is up to the task. Our feederhouse chains are built for strength and durability to optimize intake — no matter the crop. We also carry component parts like sprockets, single chains, individual slats and more.

### Features and Benefits

**High-quality CA550 and CA557 chains for greater strength:** The strength and durability of these hardened steel components make them a workhorse for harvest. Our chain specs are comparable to OEM components. In some cases, stronger CA557 chains are available as replacements for OEM CA550 chains.

**Serrated and smooth slats for optimized crop processing:** No matter the crop, our slat shape and spacing options are designed to handle grains as intensely as you need, so you can make the most of your time in the field.

**Mounted for durability:** Chains are mounted using heavy-duty, 3/8" grade 8 hardware for longer wear and locknuts for security and peace of mind.

**Solid chrome pins for strength:** Resistance to wear and corrosion is vital in the field, so we use coated chrome pins for extra dependability.

Our feederhouse chains are built to fit most makes, including John Deere®, Case IH® and Gleaner®, and fit combines with and without rock traps.

*Abilene Machine is a family-owned and operated company that's been serving farmers for over 40 years. With an inventory of more than 40,000 parts and four locations across the United States, we'll make sure you get dependable, durable parts shipped fast.*
