# With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

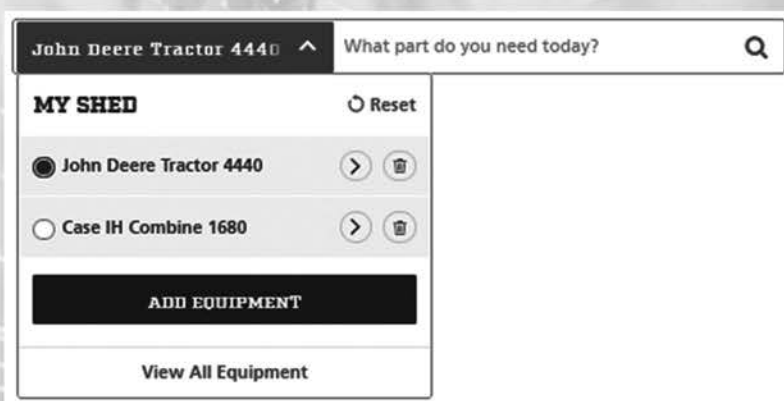

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need. As a thank you for reading about our new My Shed program, please use the code MYSHED for a 5% discount on one order through December 31, 2023.

## Longblock Assemblies

Our remanufactured longblocks meet the highest standards in quality. All remanufactured components are inspected for structural integrity, cracks and dimensional specifications and then remanufactured back to OEM specifications. The components are then assembled using the highest quality new parts. We back this with one of the best warranties in the industry.

## Hydrostats and Components

Our hydrostats are remanufactured by a remanufacturing facility recognized by Sauer/Sundstrand. All units are assembled by a factory-trained technician, using genuine new and remanufactured replacement parts. All units are fully tested to factory specifications for maximum performance.

Application	Description	Part Number	Retail Price	Core
1460, 1480, 1660, 1680	Reman Hydrostat, Eaton Single Speed Screw-in Fittings	H1460E1-54/54	\$ 3850.00	\$ 500.00

## Feederhouse Chains

Our feederhouse chains for Case IH® and International® rotary combines are assembled from high-quality CA557 heavy-duty chain. Slats are mounted using 3/8" grade 5 hardware and locktite for added durability. Conventional combine chains use CA550 chain and slats are mounted with 3/8" grade 5 plated hardware. All feederhouse chains come with serrated slats unless otherwise noted.

## Rotor Bars—Specialty Rotors

These ductile bars meet or exceed OEM specifications. Most applications and crop conditions require bars with no spikes. Crops with excessive green material might require bars with spikes to prevent roping. Sold and priced individually.

## Rotor Grates and Components

Slotted grates perform well under grain harvesting conditions, while the keystock grates are better for corn, soybeans, rice and milo. The shredder grate replaces the rear grate and has a unique keystock grate and blade system that will thoroughly shred the stalks. Installation requires less than an hour and is an alternative to purchasing a more expensive straw chopper.

Application	Description	Part Number	Retail Price	Core

## Rotor Transition Cones and Components

Rotor cones are made of abrasive-resistant steel. The 5/32" cone with one welded seam compares to OEM 3 or 5 seam cones. The 3/16" cone with one welded seam compares to OEM rice cones. The 1/4" cone with one welded seam does not have an OEM comparison.

Application	Description	Part Number	Retail Price	Core

## Rotor Front Kits and Components

Improve the performance of your Case IH® rotary combine with the addition of a KRF Rotor Flight Kit. Both styles offer you improved threshing performance, better distribution and consistent flow of material for smoother operation, while providing reduced horsepower requirements for increased fuel efficiency.

## Rotor Vane Repair Kits

- Decreases material stalling at transition
- Increases ground speed
- Bolt-on style, no modifications required - works with all crops
- Improves crop material feeding with ALL styles of impellers and flights
- Restores vane to original height

## Sickle Assemblies Without Heads

Easy-to-assemble interlocking/overlapping bar bolts together for greater field convenience. ThunderBOLT Sickles can ship via UPS and are easy to carry and store. The Gold'N Cut section utilizes a coarse serration that sharpens itself as wearing occurs, giving you the longest wear for your money. All sickle sections feature bolt-on convenience and are heat-treated for superior cutting life.

# Extended Wear Augers

Abilene Machine carries the best-built augers in the industry. Our in-house facility includes state-of-the-art equipment that balances, calibrates and tests our augers. These durable parts feature cupped flighting for longer life and greater grain-handling capacity.

## Features and Benefits

### Greater grain retention

Cupped Super-Edge™ Helicoid Flighting with enhanced edge thickness and up to 30° lean from vertical allows for increased grain-handling capability.

### Increased wear resistance

Key edges of the Super-Edge™ Helicoid Flighting are up to 50% thicker (and a guaranteed minimum of 30% thicker) than standard augers. The tapered edges have targeted reinforcement, so our augers are stronger at the exact spots that tend to wear more easily, giving them a longer life in the field.

### Improved strength and durability

Advancements in the Super-Edge™ Helicoid Flighting mean farmers have a stronger auger without extra weight and a more durable part.

### Optimized output

With a longer life and higher grain capacity, our augers provide productivity gains over a much longer period, significantly reducing the cost per bushel.

*Abilene Machine is a family-owned and operated company that's been serving farmers for over 40 years. With an inventory of more than 40,000 parts and four locations across the United States, we'll make sure you get dependable, durable parts shipped fast.*

# Abilene Machine LLC

Family-Owned Since 1980

As one of the largest and most innovative ag replacement parts companies, getting you the parts you need is a responsibility we take seriously. We stock more than 40,000 new, used and remanufactured parts at 4 locations nationwide.

## LEDs Light Up Your World

LEDs are extremely energy efficient & more durable than traditional incandescent light bulbs. Other benefits include a much longer lifespan, reduced maintenance costs and higher safety.

LED kits and single replacement lights available for tractors, combines, harvesters, balers, loaders, skid steers, telehandlers and more.

# Grammer® Seats & Suspensions

COMFORT THAT NEVER QUILTS

Grammer® seats are designed ultimately for the people who use them. Maximum comfort and intuitive operation are therefore major design principles.

For years, Grammer® has worked intimately with leading scientists researching the human spine. These findings then flow directly into their product development. You can feel it in every seat they design.

**After all, the operator shouldn't fit the seat;  
the seat should fit the operator.**

**Abilene Machine LLC**

[AbileneMachine.com](http://AbileneMachine.com)

Agricultural and Industrial Belts

Q Power® uses the highest quality materials and the most advanced manufacturing in the world to build their belts.

**Quality always comes through**

New, Used and Remanufactured

Honest. Personal. Service.

# Draper Belts

Abilene Machine is proud to offer the Q-Power<sup>®</sup> line of heavy-duty draper belts to keep up with the demands of harvest. These best-selling products are comparable to OEM parts in tensile strength, tear strength and puncture resistance. They are exceptional replacements for many makes, including John Deere<sup>®</sup>, New Holland<sup>®</sup>, Case IH<sup>®</sup> and MacDon<sup>®</sup>.

## Features and Benefits

### Teardrop Cleats for Better Durability

Our draper belts are reinforced with teardrop-shaped fiberglass rods for increased cross-directional strength and durability.

#### Teardrop vs Diamond Cleat

### Filament Fibers for Increased Tensile Strength

The patented design is made with filament fibers — long, continuous, uniform fibers — that consistently outperform belts made from typical spun fiber in strength tests. They stand up better to stretching and pulling than the competition.

### Coated for Enhanced Tear and Puncture Resistance

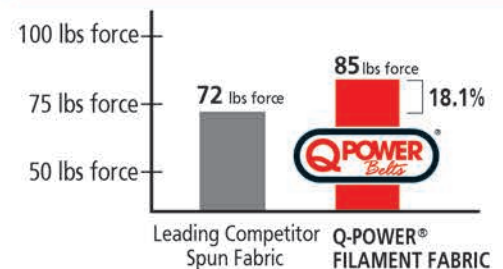

Q-Power<sup>®</sup> Draper Belts feature both skim and friction coating for enhanced performance. This rubber reinforcement is applied to the top (skim) and bottom (friction) of the belt, increasing durability and fabric protection, while reducing drag and belt weight.

*Abilene Machine is a family-owned and operated company that's been serving farmers for over 40 years. With an inventory of more than 40,000 parts and four locations across the United States, we'll make sure you get dependable, durable parts shipped fast.*

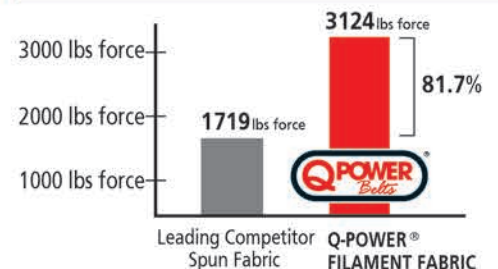

#### Q-Power<sup>®</sup> is 29.5% stronger
