With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

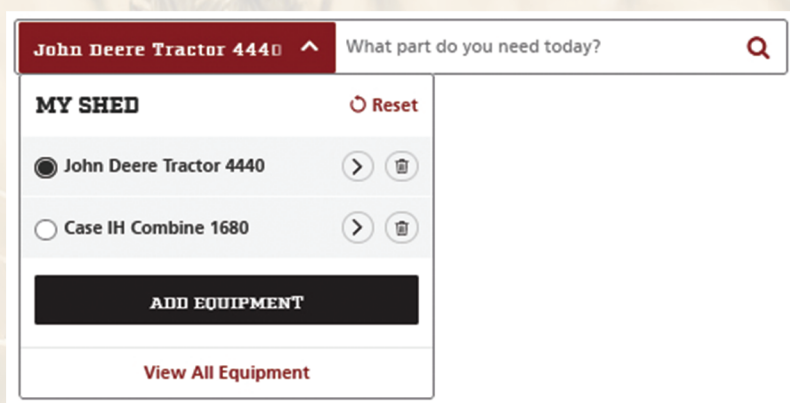

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need.

Extended Wear Augers

Abilene Machine carries the best-built augers in the industry. Our in-house facility includes state-of-the-art equipment that balances, calibrates and tests our augers. These durable parts feature cupped flighting for longer life and greater grain-handling capacity.

Features and Benefits

Greater grain retention

Cupped Super-Edge™ Helicoid Flighting with enhanced edge thickness and up to 30° lean from vertical allows for increased grain-handling capability.

Increased wear resistance

Key edges of the Super-Edge™ Helicoid Flighting are up to 50% thicker (and a guaranteed minimum of 30% thicker) than standard augers. The tapered edges have targeted reinforcement, so our augers are stronger at the exact spots that tend to wear more easily, giving them a longer life in the field.

Improved strength and durability

Advancements in the Super-Edge™ Helicoid Flighting mean farmers have a stronger auger without extra weight and a more durable part.

Optimized output

With a longer life and higher grain capacity, our augers provide productivity gains over a much longer period, significantly reducing the cost per bushel.

Abilene Machine is a family-owned and operated company that's been serving farmers for over 40 years. With an inventory of more than 40,000 parts and four locations across the United States, we'll make sure you get dependable, durable parts shipped fast.
