My Shed Feature on AbileneMachine.com

Narrow down your parts search specifically to your equipment

Select the make, equipment and model of your machine in the dropdown menus located at the top of the home page. Then select a category or select "Any Category" to search all. Click the "Go" button.

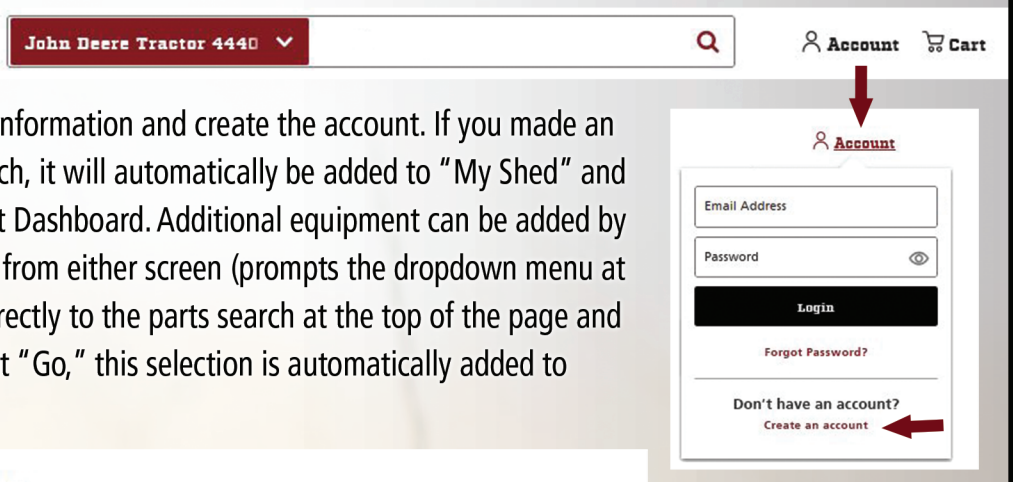

With your equipment selected, enter the product you are searching for (or part number if you have it). Suggested results will be displayed, or press enter to go to a list of all product results for your machine.

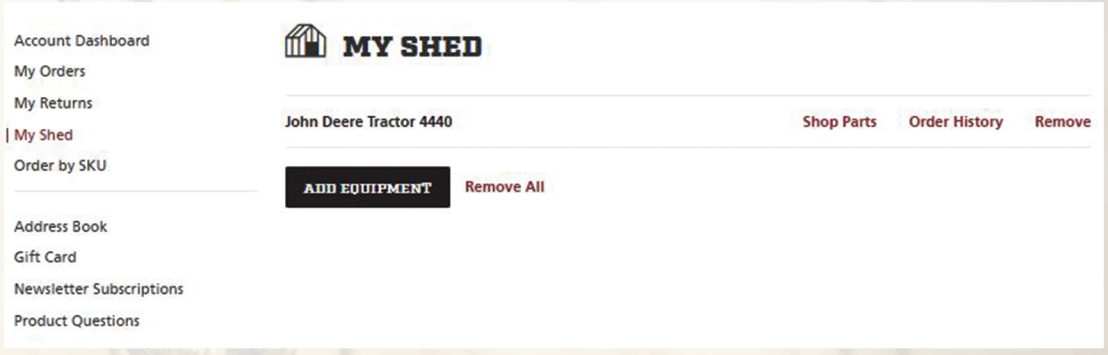

With the My Shed feature, your equipment selections can now be saved to your account to make future searching convenient and easy!

Once you create an account to access "My Shed," your equipment can be saved and you can also view past order history. This makes yearly maintenance easier and faster when it comes to getting the parts you need.

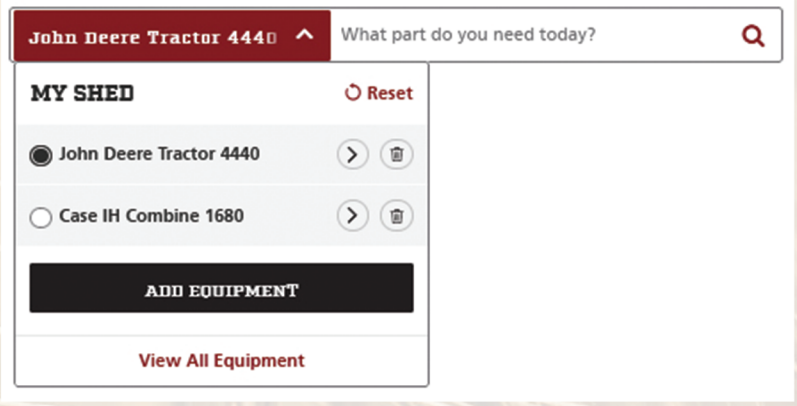

To create an account, select the Account icon to the right of the search bar and select "Create an account."

Follow the next screen to enter your information and create the account. If you made an equipment selection in the parts search, it will automatically be added to "My Shed" and will also be viewable on your Account Dashboard. Additional equipment can be added by clicking the "Add Equipment" button from either screen (prompts the dropdown menu at the top to open again) or by going directly to the parts search at the top of the page and making a new selection. When you hit "Go," this selection is automatically added to your shed.

Quickly switch between equipment in your Shed by clicking the dropdown menu at the top of the page and selecting between machines. The page will reload to that selection and is ready to search for the products you need.

Remanufactured Transmission Assemblies

If you're noticing shaking, vibrating or slippage, you'll want to check your transmission. Wear on various components can cause more damage to the overall system if left unchecked. Our remanufactured transmissions fit John Deere® 6000, 7000 and 8000 series tractors and extend the life of your equipment.

Remanufactured for Dependability and Value

Our in-house remanufacture facility uses state-of-the-art techniques to ensure you get the best possible parts. Our qualified technicians disassemble, clean, inspect and rebuild the assemblies to strict specifications. These dependable replacement parts are more cost effective than OEM parts.

Rigorous Testing

All transmissions must pass rigorous tests before we sell them. Transmissions are tested under load in every gear and pressures are monitored at specified temperatures. If they pass inspection, the ready-to-use assemblies are shipped in special steel freight carriers to ensure they arrive at your operation damage-free.

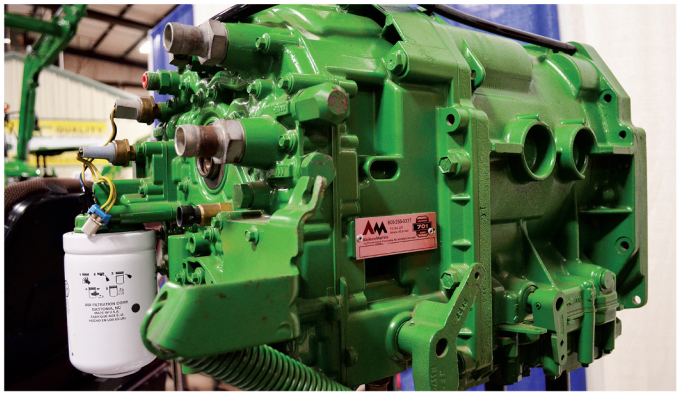

Core Charge/Exchange

Our core charge/exchange program is one more way we help you make the most of your investment.

Grammer® Seat Identification Guide

Grammer® seats are ultimately designed for the people who use them, with maximum comfort and intuitive operation being major design principles. After all, the operator shouldn't fit the seat; the seat should fit the operator.

We offer several seat options – including the 721, 731, 741 and 742 shown below – with more available online. Let us help you easily pick the best fit by reviewing the seat number identification guide and determining your seating needs!

7 2 1

- **Type of Seat Top**
- **Seat Width**
- **Backrest Height**

GRAMMER

Type of Seat Top	Width of Seat Cushion	Height of Backrest
3 = 1 Pan (Gator Seat)	1 = Narrow, 15.70"-17.70"	1 = Low Back, 17.70"
5 = Small, 2-Part Seat	2 = Medium, 15.70"-19.50"	2 = High Back, 20.50"
7 = Large, 2-Part Seat	3 = Wide, 19.50"-21.30"
